

VON ANDREW M. CASTILLO

132 E Mendoza, Buting, Pasig City

09617075345

voncastillovon@gmail.com

Self-driven Software Developer with over seven years of hands-on programming experience building end-to-end applications, game systems, and backend logic across academic and independent projects. Demonstrates strong technical adaptability in engineering core system logic, optimizing database performance, and bridging backend APIs with interactive frontends and mobile interfaces.

TECHNICAL SKILLS

- **Programming Languages:** C#, Java, JavaScript, Python, C++, SQL, HTML5, CSS3
- **Backend & API Development:** RESTful APIs, Node.js, Express, Flask, Socket Programming, System Architecture
- **Databases & Cloud Storage:** SQL (MySQL/PostgreSQL), Firebase Firestore, Cloudinary
- **Frameworks & Engines:** Unity Engine, React, Next.js, Bootstrap, Tailwind CSS
- **Hardware & IoT:** NodeMCU, Arduino, Microcontroller Socket Interfacing
- **Tools & Platforms:** Git, GitHub, Visual Studio, VS Code, PyCharm, Postman, Docker

TECHNICAL EXPERIENCE

Software Developer Intern | *TBL Hub* (February 2026 – May 2026)

- Developed full-stack web features and optimized API routes for the UMak Store platform.
- Engineered logic and form structures for the UMak Academic Questionnaire System.
- Conducted Quality Assurance (QA) testing, bug tracking, and functionality validation for the Bantay Bayan application.
- Completed 486 hours of technical internship focusing on agile collaboration and software delivery.

EXPERIENCE

Back-End Developer/Database Developer | RainHarvest — IPOPHL Innovation Entry

- Developed an AI-driven, climate-resilient solution for the Intellectual Property Office of the Philippines (IPOPHL) competition focused on inclusive community technology.
- Engineered backend API services and database structures to process real-time environmental and community data.
- Integrated machine learning classification logic to deliver actionable, low-latency insights for localized decision-making.
- Designed an accessible, low-bandwidth user interface tailored for reliable operation across underserved local communities.

Game Developer | Scamester (August 2025 - May 2026)

- Engineered REST API bridges connecting machine learning classification endpoints directly with live C# Unity game logic.
- Established Firebase Firestore datastore integration for dynamic session tracking and user synchronization.
- Implemented responsive UI state handlers and core game mechanics inside the Unity Engine.

Back End Developer | Booklat (February 2025 - June 2025)

- Architected C# backend logic and transactional database schemas for a digital library repository.
- Integrated Cloudinary API pipelines for dynamic cover image compression, upload management, and cloud storage.
- Configured real-time datastore listeners and security rules in Firebase.

Game Developer | Deception (August 2024 - January 2025)

- Programmed core gameplay mechanics, event trigger routines, and state handlers in C# and Unity.
- Integrated dynamic character animation states, environmental FX, sound management systems, and audio queues.
- Enforced strict game design sequences and execution parameters across all level triggers.

Full Stack Developer | Mobile Pet Feeder (February 2024 - June 2024)

- Fabricated an automated physical hardware prototype using NodeMCU microcontrollers and Arduino boards.
- Developed a native Java mobile interface communicating wirelessly with hardware microcontrollers via network sockets.
- Programmed backend trigger routines and error-handling mechanisms across microcontroller and mobile app layers.

Back End Developer - Library Management System (August 2023 - January 2024)

- Designed normalized relational database schemas and indexed table structures using SQL.
- Programmed desktop administrative application logic using C#.
- Tuned SQL query parameters and execution paths, significantly increasing data retrieval speed.

EDUCATION

Bachelor of Science in Computer Science | University of Makati, Philippines (2022 - 2026)

Senior High School Diploma in TVL – ICT | Benigno “Ninoy” Aquino Senior High School, Philippines (2020 - 2022)
